

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

March 28, 2002 LB 791

SENATOR CUDABACK: You have heard the opening on the motion to indefinitely postpone LB 791. Open for discussion on that motion. Senator Schrock.

SENATOR SCHROCK: Mr. President, members of the Legislature, we've been kind of killing time this morning but Senator Chambers and the good senator from Norfolk had a little conversation this morning that touched me about French. Now, I being from Holdrege, Nebraska, you wouldn't...and a farmer...you wouldn't think I'd know anything about French. Well, I've been married to a French teacher for almost 37 years and that doesn't make me cultured, but I know a few words. But let me tell you, I have trouble mastering the English language. Well, I don't master it. I have trouble using the English language, let alone trying to learn French. But you talked about escargot this morning, Senator Chambers. Have you ever eaten escargot?

SENATOR CHAMBERS: Oh, no.

SENATOR SCHROCK: They are quite tasty little critters and if you would like to join me someday, I could arrange for some escargot to be prepared and we could dine.

SENATOR CHAMBERS: "Mais non."

SENATOR SCHROCK: Okay. With that I will give the rest of my time back to the Chair.

SENATOR CUDABACK: Thank you, Senator Schrock. Senator Smith.

SENATOR SMITH: Thank you, Mr. President and members. I rise in opposition to the IPP motion because I would like the body to be able to consider the amendment that I've filed. And basically that amendment, as you'll be seeing on your computers, it would basically require that if one lottery game is being promoted, the estimated odds of winning the grand prize in lottery games shall be printed on all informational and educational materials and promotional advertisement related to such game. And if more than one lottery game is being promoted, the combined estimated average odds of winning the grand prizes in the lottery games shall be printed on all informational and educational materials
